

## Rinkoo Dalan

Senior Consultant, Endocrinology , Tan Tock Seng Hospital  
Associate Professor, Lee Kong Chian School of Medicine  
MBBS, MRCP(UK), FRCP(Edin), FAMS(Endocrinology), MSc(Clinical Trials), PhD (NTU)

### Research Interests:

- Vascular Function
- Cardio-Metabolic risk factors
- Diabetes

Email: [Rinkoo\\_dalan@ttsh.com.sg](mailto:Rinkoo_dalan@ttsh.com.sg)

## Biography

Rinkoo Dalan began her research journey with the DUKE-NUS Tanoto Diabetes Initiative and NHG Clinician Scientist Scheme, investigating vitamin D supplementation's effects on vascular function. Supported by a TTSH center grant, she expanded her studies to explore vascular function in various vascular beds.

In 2014, Dr. Dalan received the NMRC Transition Award, enabling her to create a patient resource with comprehensive vascular profiling. Later, through the NMRC Clinician Scientist Award, she researched therapeutic impacts on vascular health in newly diagnosed diabetes patients. Alongside this work, she completed a Master's in Clinical Trials from LSHTM and a PhD from LKCMedicine, NTU.

With support from Ng Teng Fong Foundation, National Healthcare Group, and LKCMedicine, she established the Predict-2-Prevent Program, focused on personalized cardiometabolic risk management. This program aims to improve cardiovascular risk prediction and monitoring in chronic conditions, with tailored interventions for long-term vascular health benefits. It emphasizes patient and provider perspectives, fostering strong collaborations with LKCMedicine, NTU, industry, and healthcare institutions. Current research includes exploring Colchicine as a cost-effective option to reduce cardiovascular risk in type 2 diabetes, funded by the Tanoto Medical Research Foundation, and developing digital twin-based predictive analytics for diabetes management with MESH BIO, supported by the NHIC.

## Notable Research Awards & Grants from Past 5 Years

Name of Awards & Grants	Year Obtained
Ng Teng Fong Foundation Strategic Research Program: Personalised Cardiometabolic Risk Management: Predict 2 Prevent Program	-
Transforming Vascular Health. National Healthcare Group	-
National Health Innovation Centre (NHIC) I2A (Innovation to Adopt) Grant	2023 - 2024
Tanoto Medical Research Fund: The role of Colchicine in preventing Atherosclerotic cardiovascular disease in Type 2 Diabetes	-
NMRC Clinician Scientist Award	2018
NMRC Transition Award	2014

## Translating Research/Innovation Into Healthcare

- The collaborative work on the development of methods to isolate plasma from blood to facilitate downstream phenotyping of blood cells to predict vascular risk with Prof Hou Han Wei was covered by the Straits Time (March 22, 2024).  
<https://www.straitstimes.com/singapore/ntu-s-potential-game-changer-for-quick-accurate-blood-samples-to-detect-cancers-and-diseases>
- Novel 3D Model Aids Vascular Disease Research. Singaporean researchers develop new 3D models to study vascular diseases. 2021
