

Er Chaozer

Senior Consultant, Department of Medicine, WH

Research Interests:

- Venous Thromboembolism

Email: chaozer_er@wh.com.sg

Biography

I am an internal medicine specialist with expertise in both acute and general internal medicine. I completed my Internal Medicine Residency and Advanced Internal Medicine Senior Residency training with the National Healthcare Group (NHG) in 2014 and 2016, respectively. I have a special interest in venous thromboembolism (VTE) and provide coordinated multidisciplinary care for VTE patients across inpatient and outpatient settings, in collaboration with vascular surgeons, interventional radiologists, haematologists, and pharmacists. My clinical experience is further enriched by attachments at Singapore General Hospital and St Thomas' Hospital in London, where I worked alongside both local and international VTE experts.
