

Manuscript Writing & Poster Presentation Seminar

Synopsis

A critical aspect of the scientific process is the reporting of new results in scientific journals in order to disseminate that information to the larger community of scientists. How can you order and organise the information you wish to present? How can you enhance the chance of your paper being published? Which journal should you submit your research paper? This workshop will take you through the stages of developing a research paper and discuss the common issues scientists face when writing a research paper.

Time Topic 8.45am Registration An Approach to the Writing of a Scientific Manuscript Structure and writing style of a Research Paper 9.00am Writing a good abstract, introduction and discussion Managing references before, during and after the research Common pitfalls when writing a research paper **Processing and Critiquing Scientific Papers** Understanding the review processes for a scientific paper 10.00am The role of a reviewer and editor Appropriate responses to reviewer's comments Choosing the appropriate journal for publication 11.00am Tea Break Key Elements of a Poster Presentation Elements of a poster 11.15am Presenting a poster in an appealing way – the dos and don'ts Preparing for a poster presentation 12.15pm End of Seminar
